Hi All,

Given the nature of the work, please utilize GKM funds to reimburse Utah's response costs.

Russell C. Leclerc

Program Director

Office of Ecosystems Protection and Remediation

Support Program

Steve Wharton: Is this something that remedial can fund? I haven't seen a dollar amount for this request but thought I'd ask. Otherwise, we'll use the GKM funds provided by HQ. It just seems that there are so many things whittling away at these dollars (we just funded the \$1m long-term monitoring). Thanks, lw

I will talk to them. Assuming they have valid costs I will likely do an amendment to their "Block Grant" cooperative agreement. Who should I work with to verify the work and associated costs? Will I fund them with the same RV \$\$?

From what I saw, they deployed a field team early on to collect samples and I believe they had office staff dealing with the response.

However, I have not really been involved in the larger response since week 3 or so other than helping out Steve at the mine site.

Typically, a State will ask us to cover their office costs but this usually happens more on an oil spill and they work directly with the Coast Guard to budget and recoup their costs.

Before I contact Dale at UDEQ I would like to hear from you all what activities did the State participate in or perform directly related to GK Mine Blowout?

Hi Cinna – I'm guessing you are more knowledgeable about this request than I am. We need to coordinate with Bob Ward as well.

Thanks,
Steve

Hi Dale,

Mr. Hestmark indicates that the person Utah needs to talk to get your Gold King response costs reimbursed is Steve Wharton.

Steve is cc'd on this email.

See you next week in Park City.

M
